Professional Profile

Senior full-stack engineer with 9+ years of experience building consumer-facing web products at scale. Core expertise in React, Remix, Next.js, TypeScript, and Node.js, with hands-on experience shipping AI-powered products and real-time collaborative interfaces. Track record of owning high-stakes user flows end-to-end, across products serving 1M+ monthly users, with latency and reliability as first-class concerns.

Languages: English (Native), Spanish (Fluent), German (B1)

Work History

01/2024 - **Senior Front-End Engineer @ Statista**

Present Leading global data and business intelligence platform serving millions of users.

Skills: React, Remix, Node.js, TypeScript, Vite, Vitest, Tailwind, Playwright, Datadog, CI/CD, Git, AWS, and others.

- Owns the registration, personalization, and account flows that form the primary conversion funnel for 1M+ monthly users, with latency and reliability treated as first-class concerns.
- Built and owned the first backend API for the registration team in Node.js/Remix, enabling persistent user personalization and reuse across product teams.
- Reduced security risk by removing sensitive URL parameters and aligning frontend/backend authentication behavior across multi-step signup flows.
- Built AI-assisted development workflows that reduce code drift and error rates, and monitor production via Datadog, resolving CI and deployment failures proactively.

05/2021 - **Front-End Engineer @ Deep Neuron Lab**

12/2023 AI-powered audit tools for financial and ESG compliance.

Skills: Vue, TypeScript, JavaScript, Vite, Cypress, HTML, CSS, Git, and others.

- Built two AI-powered SaaS products (ai/checklist and ai/numbers) from scratch as the sole frontend engineer, covering architecture, real-time collaboration, and the full product lifecycle for automated financial evidence management.
- Architected dynamic audit workflows with AI-driven suggestions, role-based access, real-time collaboration, and cross-document verification.
- Worked directly with the CEO, CTO, and backend engineers to shape product direction, identify technical constraints, and plan the roadmap.
- Established frontend patterns and code standards as the engineering team scaled from a sole contributor to a multi-developer setup.

12/2020 - **Semi-Senior Front-End Engineer @ Globant**

05/2021 Software development agency with over 25,000+employees worldwide.

Skills: Vue, JavaScript, TypeScript, HTML, CSS, Git, and others.

- Modernized a data-intensive stock trading application, transforming legacy code into Vue components across a team of 10+ developers.
- Mentored 4 junior developers on code quality through reviews and pairing sessions.
- Implemented new UI/UX designs for real-time financial data views.

08/2019 - **Front-End Engineer @ ADK Group, now Amdocs**

11/2020 Digital agency delivering web products across diverse industries.

Skills: Vue, React, Next.js, WordPress, JavaScript, HTML, CSS, Git, and others.

- Built and redesigned 10+ client websites using Vue, React, Next.js, and WordPress.
- Improved site performance through progressive enhancement and led accessibility improvements aligned with WCAG standards.
